Deadline for manuscript  
submissions:

**closed (15 November 2021)**

### Message from the Guest Editors

Sarcoidosis is a granulomatous disease that can affect every body organ to a different extent. The diagnostic role of imaging, such as computed tomography and magnetic resonance, is to reveal the presence of parenchymal infiltrates, lymphadenopathy, and also by documenting organ enlargement, nodular lesions, and patchy infiltration in extrapulmonary sites. The use of conventional ultrasound but even more that of contrast-enhanced ultrasound (CEUS) has been demonstrated to be useful to detect occult lesions and to describe the characteristics of some nodules that are not otherwise evident on the baseline examination. Finally, recent studies have highlighted that FDG PET/CT is also useful in staging the disease, in order to assess the presence of occult lesions, disease extent, treatment response and to identify the most suitable site for biopsy.

The aim of this Special Issue is to report an overview of the latest research on the diagnosis of Sarcoidosis.

## Editors-in-Chief

### **Prof. Dr. Emmanuel Andrès**

Internal Medicine Department,  
University Hospital Strasbourg,  
67081 Strasbourg, France

### **Prof. Dr. Kent Doi**

Department of Emergency and  
Critical Care Medicine, The  
University of Tokyo, Tokyo, Japan

## Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
