Deadline for manuscript submissions:

closed (5 April 2023)

Message from the Guest Editor

Head and neck tumorigenesis involves an accumulation of multiple genetic and epigenetic alterations from several important pathways, providing opportunities for cancer development and progression. Many of these cancers can be preceded by potentially malignant disorders, manifesting clinically as a series of mucosal alterations which could increase the risk of individuals with these disorders being diagnosed with cancer in their lifetime.

In a clinical context, many tools and methods have been developed to increase the accuracy in order to identify the most suspicious areas for malignancy, to define correct margins of lesions or simply to help in the screening and follow-up of patients.

In view of this, we invite authors to submit research or review articles to be published in this Special Issue that describe the most recent evaluations regarding diagnostic and screening tools or methods with potential use in the diagnosis or prognosis of head and neck cancers, also including potential malignant disorders.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
