Message from the Guest Editor

Recently, there has been rapid progress in the diagnostic and treatment of coronary artery disease. Advanced, non-invasive imaging techniques, as well as invasive functional assessment, have changed our way of thinking about indications for coronary revascularisation. In addition, new generation stents, invasive coronary imaging modalities, modern pharmacotherapy and growing operator experience have pushed forward the limits of successful percutaneous revascularisations. These have also changed the landscape of restenosis and stent thrombosis problem. Diagnostic strategies and treatment of acute coronary syndromes based on the networking concept have been developed and implemented worldwide, resulting in improved patient outcomes. A large number of clinical studies have provided important knowledge about pharmacotherapy pathways in patients with coronary artery disease. Despite all these advances, coronary artery disease is the leading cause of death worldwide, and there is still an unmet need for further investigations and improvements.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
