Message from the Guest Editor

Dear Colleagues,

It is my pleasure to invite you to contribute to the Special Issue entitled "Cardiac Electrophysiology: Clinical Advances and Practice Updates—2nd Edition". In the first volume, we published 15 papers. For more details, please visit:

Nowadays, the interventional treatment of cardiac arrhythmias represents a continuous challenge. This is mainly due to the widening of indications for implantable electronic devices (CIEDs) and for catheter ablation (CA), as well as the continuous improvement of these technologies. Despite updates in the international guidelines and worldwide consensus, evidence gaps persist at all points. The aim of this Special Issue is to provide a comprehensive overview of the advances in the diagnosis and treatment of cardiac arrhythmias, with a particular interest in the use of innovative techniques and technologies in interventional therapies. Therefore, researchers in the field of clinical arrhythmology and electrophysiology are encouraged to submit their findings as original articles or reviews to this Special Issue.
