### Message from the Guest Editor

Dear Colleagues,

Migraine is a polygenic, dysautonomic, and chronic neurological condition marked by a "lower threshold of neuronal hyper-excitability", known as "the migrainous brain", with distinctive periodicity. Migraine is divided into migraine with aura (MA) and migraine without aura (MO). There is no cure for migraines, but several acute and preventive treatments are available to help mitigate the symptoms. At present, some drugs are used clinically to reduce the frequency and severity of migraine attacks, such as Analgesics, Triptans, CGRP receptor antagonists, etc. Acupuncture and feverfew are alternative therapies to relieve migraines. Devices and surgery are options for those who show no improvement with medication. However, migraine treatment is often limited by insufficient therapy response, leading to the need for individually adjusted medication.

This Special Issue aims to provide an overview of the recent advances in the field of migraines. Therefore, researchers in this field are encouraged to submit original articles, reviews, and commentaries to this Special Issue (case reports and short reviews are not accepted).

an Open Access Journal by MDPI

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
