Deadline for manuscript submissions:

31 October 2024

Message from the Guest Editors

Advanced ultrasonography can be applied from the beginning of intrauterine fetal life. Prenatal diagnosis and maternal–fetal medicine are rapidly evolving. New imaging modalities and laboratory methodologies have allowed us to diagnose maternal–fetal pathologies early and therefore provide rapid treatment.

In this Special Issue, we have assembled a collection of articles from experts in maternal–fetal medicine to highlight how advances in prenatal ultrasound have caused a revolution in screening and diagnosis. Our objective is to provide an overview of the latest results achieved in this field. The spectrum of topics ranges from fetal diagnosis to genetic testing modalities and maternal–fetal medicine.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
