Message from the Guest Editors

Dear Colleagues,

Eating disorders (EDs) are currently considered among the most prevailing public health problems, reaching an epidemic proportion in many Western countries. Nevertheless, symptoms and syndromes of self-starvation are not a new, modern phenomenon. They first appeared in the clinical descriptions of anorexia by Gull and Lasegue in the 19th century, and since then have been observed for more than 1500 years, being interpreted in each era according to prevailing beliefs and cultural norms (Witztum, Stein and Latzer, 2005). EDs, particularly anorexia nervosa (AN)—the most studied ED—were originally conceptualized as of sociocultural (Stice, Shupak-Neuberg, Shaw, Stein, 1994), psychodynamic (Mushat, 1982), or psychosomatic origin (Minuchin, Roseman, Baker 1978). However, they are currently considered to be mainly induced and maintained by a host of genetic, neurobiological, and neurocognitive influences (Keel and Klump, 2003; Kaye et al., 2013; Roberts et al., 2010, 2013; Brownell and Walsh, 2017).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
