Message from the Guest Editors

As many of you already know, multiple sclerosis (MS) is characterised by physical symptoms such as muscle weakness, gait impairment, balance problems, spasticity and fatigue and mental symptoms such as cognitive impairment and depression.

Due to both physical and mental problems and fearing symptoms exacerbation, people with MS (pwMS) decrease their physical activity; inactivity places pwMS at increased risk of comorbid conditions, thus worsening the disease course. Consequently, reduced physical activity may result in increased disability, worse mobility, worse general health and quality of life. Several studies have demonstrated that both aerobic and endurance/strength exercise can lead to significant and important improvements in different areas of cardiorespiratory fitness, muscle strength, flexibility, stability, tiredness, cognition, quality of life and respiratory function in pwMS. With this Special Issue, we hope to encourage submissions that discuss the current state-of-the-art, address ongoing knowledge gaps and focus on ongoing controversies related to exercise and multiple sclerosis.

We look forward to receiving your submission.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
