Message from the Guest Editors

Dear Colleagues,

Cardiac biomarkers such as troponins and natriuretic peptides have greatly impacted clinical decision making and improved our understanding of the molecular mechanisms of different disease conditions. However, the biomarkers currently in use do not reflect all the disease pathways involved in cardiac disease conditions, which range from acute coronary syndrome to heart failure, pulmonary hypertension, and arrhythmias. Furthermore, novel biomarkers could be critical for establishing diagnoses and for the follow-up of several comorbidities in heart failure. Biomarkers can be elucidated through a blood test or a modern image technology, such as left atrial strain or novel cardiac MRI sequences and techniques.

In this Special Issue, we will provide an overview of the latest developments in the field of biomarker research, from findings on molecular pathways and cellular communication (e.g., microRNA) to the clinical use of well-known and novel biomarkers.

Keywords: novel biomarkers; heart diseases; heart failure; heart failure co-morbidities

Deadline for manuscript submissions:

April 2023)

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
