Message from the Guest Editor

Dear Colleagues,

For over 100 years, the only therapy used for glaucoma has only been hypertensive. At present, we are trying to understand if there are other therapeutic possibilities beyond these. In fact, glaucoma is a multifactorial disease where proapoptotic signals develop towards retinal ganglion cells. In light of the new pathogenetic acquisitions, it is possible to hypothesize the use of new therapeutic approaches to combat this complex disease. The purpose of this Special Issue is to illustrate the new developments that are taking place in the study of glaucoma from pathogenesis to its therapy.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
