Deadline for manuscript submissions:

20 February 2025

Message from the Guest Editors

In recent years, major advances have been made in the diagnosis and treatment of melanoma, leading to an improvement in the overall survival rate of melanoma patients. Early and accurate diagnosis is crucial to improving clinical outcomes, as an early misdiagnosis can significantly reduce a patient's chance of survival. The development of dermoscopy, confocal microscopy and other non-invasive techniques helps dermatologists diagnose early melanoma, although none of these techniques are 100% accurate. On the other hand, systems based on artificial intelligence (AI), particularly deep learning, are being increasingly studied, as the use of AI might lead to more precise and faster diagnoses.

Advances in our understanding of the pathophysiology of melanoma have enabled the identification of its implications in terms of clinical features and the development of therapy. The aim of this Special Issue is to highlight recent advances in the context of the diagnosis, treatment and prediction of the prognosis for melanoma.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
