Message from the Guest Editors

Foot disorders continue to be a significant cause of hospitalization and one of the most frequent health reasons for orthopedic surgical interventions, affecting patients' quality of life, modifying daily habits, and limiting their mobility and autonomy with major complications. We re-opened the 2nd edition (You can access the first edition here:

https://www.mdpi.com/journal/jcm/special_issues/orthopedic_foot_disorders

In this Special Issue, we would like to offer researchers a platform to share recent scientific findings in these contexts by inviting original clinical and research articles, meta-analyses, and systematic and narrative reviews focusing on the global aspects of the best potential orthopedic management of foot disorders.
