Message from the Guest Editors

The value of using non-invasive imaging methods such as ultrasound and other imaging tools is essential for diagnostics in obstetrics and gynecology.

Modern imaging methods play an increasingly important role in daily diagnostics. New handheld devices are also increasingly being used in the field of gynecology and obstetrics, and so the training and further education of these new methods offers new approaches for patient diagnostics. However, evidence still has to be delivered concerning their value in daily clinical practice.

The use of applications (apps) is also growing among patients and physicians to assist with medical care and patient interaction.

For this Special Issue, submissions exploring “Imaging applications in Obstetrics and Gynecology” are invited.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
