Message from the Guest Editors

Renal transplantation is the best treatment for end-stage renal disease patients and it is widely delivered in developed countries. However, there are a large number of complications that arise after transplantation hampering its short- and long-term outcomes. In the present Special Issue of the *Journal of Clinical Medicine*, we aim to collect a number of reviews and original articles that highlight significant advances in the management of renal transplants and its complications. As complications directly impact on the health and the outcome of transplant recipients, this Special Issue should increase the awareness as well as the knowledge of transplant physicians and researchers in these issues.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
