Message from the Guest Editor

For Crohn's disease, attempts have been made to reduce the reoperation rate by devising new anastomotic methods. In addition, the development of surveillance and appropriate treatment methods for cases with cancer is a problem. Evaluation of the patient's QOL is also an important evaluation method. I look forward to a paper on the development of surgical treatment for IBD from various perspectives.

- Inflammatory Bowel Disease
- Ulcerative colitis
- Crohn's disease
- Emergency surgery
- Laparoscopic surgery
- Minimally invasive surgery
- Colitis associated cancer
- Surgery for anal lesion of Crohn's disease
- Quality of life

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
