Deadline for manuscript
submissions:
closed (28 March 2023)

Message from the Guest Editor

Dear Colleagues,

The eye is one of few organs to possess immune privilege to control excessive inflammation and to maintain homeostasis, likely because excessive inflammation of the eye tissue may cause irreversible visual impairment. Recently, the field of cross-hierarchical integrative data-driven biological research has received attention owing to the development of medical big data and artificial intelligence technologies. Such analyses may have implications for elucidating various pathophysiology as they encompass all levels of cellular function from intracellular molecular dynamics to end phenotypes. Ultimately, they may promote further understanding of ocular inflammatory pathologies and lay groundwork for the four pillars of P4 (predictive, personalized, preventative, and participatory) medicine for human-centered healthcare. The scope of this Special Issue is to provide an overview of recent advances on basic and clinical innovations in the field of inflammatory eye disease. Therefore, researchers in the field of inflammatory eye disease are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
