submissions:

closed (30 September 2021)

Message from the Guest Editor

Despite enormous scientific effort and continuous improvement, critically ill patients are still at high risk for morbidity and mortality. To improve this, a profound understanding of physiological and pathophysiological interactions, advanced diagnostic tools, and individualized therapies is crucial. Interdisciplinary intensive care medicine is therefore the key approach to incorporating knowledge from multi-modality diagnostic and therapeutic approaches for individualized therapies in patients suffering from critical illness.

The present Special Issue “Interdisciplinary Intensive Care” welcomes submissions in this field, addressing how innovative diagnostic and therapeutic strategies can improve patient management and outcome.

Beyond specialists from intensive care medicine, researchers of all affiliated disciplines with a focus on basic research or patient care are invited to submit original articles or reviews in their area of expertise in order to enhance the awareness of interdisciplinarity in modern intensive care medicine.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
