Message from the Guest Editor

Dear Colleagues,

Intra-abdominal infection (IAI) is a major cause of morbidity and mortality and a common origin of sepsis and septic shock. IAIs result from the inflammatory process originating from infection or perforation of the gastrointestinal (GI) tract, such as appendicitis, cholecystitis, diverticulitis, peptic ulcer disease, and obstruction of the GI tract or mesenteric vasculature, such as malignant obstruction or mesenteric infarction.

Reducing morbidity or mortality, early diagnosis, and treatment including preoperative care and surgical intervention is mandatory.

This Special Issue is devoted to articles that review diagnostic, therapeutic strategies in IAIs, including clinical and basic research.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
