submissions:

15 April 2025

Message from the Guest Editor

Dear Colleagues,

The number and incidence of hip fractures are increasing and are associated with increased morbidity, increased frailty, and mortality risk. Therefore, optimising the management of these patients is important for the patient to ensure their best outcomes in healthcare systems where an increasing number of patients are presenting with this injury.

Despite the vast amount research around hip fracture care, unanswered issues remain in relation to time to theatre, perioperative care, minimising the length of hospital stay, returning to place of domicile, deep infection, the failure of fixation/revision, and limiting the frailty associated with injury and mortality risk.

This Special Issue will focus on the epidemiology, outcomes, and care of individuals with hip fractures. The aim is to produce a Special Issue that provides readers with current information on the care of these individuals following their injury to help optimise management.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
