Message from the Guest Editor

Dear Colleagues,

In recent decades, huge technological developments in cardiovascular imaging have been achieved. Echocardiography still the most important basic technique. New methodologies have become a part of everyday routine, including three-dimensional and speckle tracking echocardiography. Moreover, novel approaches have also arisen, such as the non-invasive estimation of myocardial work based on echocardiographic strains and blood pressure data. The aim of this Special Issue is to collect high-impact papers on these topics, demonstrating their clinical usefulness and diagnostic and prognostic impacts.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
