### Message from the Guest Editor

This Special Issue, “Cardiac Anesthesia and Intensive Care”, for the *Journal of Clinical Medicine* aims to showcase the latest research and advancements in the field of perioperative care for cardiac surgery patients. This Special Issue will cover a wide range of topics, including anesthetic techniques, monitoring strategies, hemodynamic management, and postoperative intensive care. The articles in this Special Issue will address the unique challenges faced by anesthesiologists and intensivists in managing patients undergoing cardiac surgery. From preoperative risk assessment to intraoperative management and postoperative care, the authors will present evidence-based approaches to optimize patient outcomes. This Special Issue will also explore the use of novel technologies, such as point-of-care ultrasound and advanced hemodynamic monitoring, in guiding clinical decision-making. Furthermore, this Special Issue will delve into the management of specific patient populations, such as those with advanced heart failure, pulmonary hypertension, or congenital heart disease.
