

## Clinical Advances in Genetic Obesity and Health

Guest Editors:

### **Prof. Dr. Rena Kosti**

Department of Nutrition and Dietetics, School of Physical Education, Sports and Dietetics, University of Thessaly, 42132 Trikala, Greece

### **Dr. Ioanna Panagiota Kalafati**

1. Department of Nutrition and Dietetics, School of Health and Education, Harokopio University of Athens, 17676 Athens, Greece  
2. Department of Nutrition and Dietetics, School of Physical Education, Sports and Dietetics, University of Thessaly, 42132 Trikala, Greece

Deadline for manuscript submissions:

**27 January 2025**

### **Message from the Guest Editors**

This Special Issue aims to explore the latest clinical and research advancements in the field of genetic obesity as well as any obesity-related comorbidity, such as diabetes mellitus, cardiovascular disease, and metabolic syndrome. Unraveling the genetic component of obesity onset and progression will shed light on developing tailor-made and more effective treatment strategies.

The following Special Issue encourages the submission of original research articles and reviews that offer novel insights into i) the role of genetic variants in obesity diagnostics, ii) the role of genetic variants in the development of diagnostic tools for the early detection of genetic obesity, iii) the role of genetic variants in the evaluation of individuals' response to clinical interventions (both pharmaceutical and lifestyle interventions), iv) the effect of gene–lifestyle interactions and their clinical implications, and v) the connection between pre-clinical findings and clinical solutions through translational research. Welcome to contribute papers, please click [here](#) to find more details.

## Editors-in-Chief

**Prof. Dr. Emmanuel Andrès**

Internal Medicine Department,  
University Hospital Strasbourg,  
67000 Strasbourg, France

**Prof. Dr. Kent Doi**

Department of Emergency and  
Critical Care Medicine, University  
of Tokyo, Tokyo 113-8655, Japan

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
