submissions:

30 October 2024

Message from the Guest Editors

Dear Colleagues,

Shoulder and elbow disease includes a wide range of conditions that affect the joints, muscles, and tissues around the shoulder and elbow. The diagnosis and treatment of these conditions require specialized medical attention. Orthopedic specialists use advanced techniques to accurately diagnose the underlying issues and develop customized treatment plans that may include pain management and surgical procedures. The ultimate goal is improved function and reduced pain for patients suffering from shoulder and elbow disease. An individual rehabilitation plan has to follow international guidelines and requires a multidisciplinary and interdisciplinary team for its full operation, with expert physiotherapists and physiatrists in shoulder and elbow pathologies and their rehabilitation.

We look forward to your enthusiastic participation in this Special Issue that will promote the scientific communication of our knowledge with the ultimate goal of positively influencing the treatment and care for our patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
