submissions:

30 November 2024

Message from the Guest Editors

Dear Colleagues,

Preterm birth remains a major challenge in modern obstetrics. Neonatal prematurity is a leading cause of neonatal morbidity and mortality and is associated with short and long-term complications, prolonged hospital stays, and a major financial burden on the health system. The result of premature birth has a wide, heterogeneous range of etiologies with several conditions leading to both spontaneous preterm birth and indicated iatrogenic preterm birth due to maternal or fetal conditions. Much research has been conducted to determine risk factors predisposing patients to these conditions, screening methodologies, and interventions that may help prevent preterm birth. This Special Issue aims to provide updates and new research in any of the aspects related to preterm birth, including, but not limited to, risk factors, demographic and baseline characteristics associated with at-risk patients, racial disparity in the risk or outcomes, screening methods, potential interventions or preventions strategies to reduce spontaneous or iatrogenic preterm birth and more.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
