

## Innovation in Head and Neck Reconstructive Surgery—Series 2

Guest Editors:

**Dr. Achille Tarsitano**

1. Maxillo-Facial Surgery,  
Department of Biomedical and  
NeuroMotor Sciences, University  
of Bologna, Bologna, Italy  
2. Head of Oral and Maxillo-Facial  
Surgery Unit, IRCCS Azienda  
Ospedaliera Universitaria di  
Bologna, Bologna, Italy

**Prof. Dr. Florian M. Thieringer**

Department of Biomedical  
Engineering, University of Basel,  
Gewerbestrasse 14, 4123  
Allschwil, Switzerland

Deadline for manuscript  
submissions:

**25 October 2024**

### Message from the Guest Editors

The field of head and neck reconstruction is exceptionally complex. Many of the anatomical structures requiring reconstruction have a crucial role in facial morphology and for functions such as speech, swallowing, and mastication. All these aspects strongly influence the patient's daily quality of life.

Over the past few years, the development of new technologies such as virtual surgical planning and 3D printing have been shown to result in better outcomes in terms of reconstructive accuracy, with good improvement in results as compared to traditional reconstruction techniques. The field of head and neck reconstruction is on the move. In fact, computer-assisted surgery with customized implants is becoming increasingly common for head and neck reconstruction, also associated with revascularized tissue transfer. These techniques allow surgeons to provide increasingly personalized reconstruction, improving the average results and reducing surgical time.

The present Special Issue aims to explore these new frontiers of reconstructive surgery as supported by 3D technology.

## Editors-in-Chief

**Prof. Dr. Emmanuel Andrès**

Internal Medicine Department,  
University Hospital Strasbourg,  
67000 Strasbourg, France

**Prof. Dr. Kent Doi**

Department of Acute Care  
Medicine, University of Tokyo,  
Tokyo, Japan

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
