Message from the Guest Editor

Dear Colleagues,

It has now been 22 years since the first transcatheter aortic valve implantation (TAVI) implant. The indications have moved from high-risk to low-risk, as have younger patients. There has been a huge evolution in valve development and delivery systems, imaging, and procedural strategy. Still, we have the issue of durability: “Who lives longer, the valve or the patient”? With TAVI in younger patients, bicuspid valves and aortic regurgitation have to be addressed. The explant of a TAVI valve may be hazardous, but it is an increasing trend in the US.

These topics will be discussed by the opinion leaders in this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
