Dr. Kim W.M. Van Delft

Department of Obstetrics and Gynaecology, Jeroen Bosch Hospital, Den Bosch, The Netherlands

Deadline for manuscript submissions:

6 November 2024

Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to address the pressing issues surrounding female lower urinary tract symptoms (LUTSs), including pelvic organ prolapse (POP) and urinary incontinence (UI). Despite significant advancements in research, there remain core problems to be solved, such as understanding the multifactorial etiology of these conditions, improving diagnostic accuracy and refining treatment modalities to enhance patient outcomes. The scope of this Special Issue encompasses a broad array of topics, including, but not limited to, epidemiology, pathophysiology, risk factors, diagnostic techniques, treatment strategies and patient outcomes related to female LUTSs. By mobilizing contributions from diverse research disciplines, including gynecology and obstetrics, urology, physiotherapy, general surgery and basic science, this Special Issue seeks to foster interdisciplinary collaboration and knowledge exchange, ultimately advancing our understanding and management of these complex and prevalent conditions in women.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
