Message from the Guest Editors

Hepatocellular carcinoma (HCC) is the most common liver malignancy. Despite significant advances in the treatment of chronic liver diseases, it still remains a major cause of cancer-related mortality. In recent years, the advent of immunological therapies has widened the therapeutic scenario and helps clinicians' management of these difficult patients. This Special Issue aims to cover the most relevant information currently available both on the basic science and on the clinical side, ranging from the microbiota to liver transplantation (OLT) with a focus also on grey areas (i.e., differential diagnosis between HCC and cholangiocarcinoma in cirrhotic patients, direct acting antiviral treatment and HCC recurrence post-OLT or downstaging/superdownstaging for HCC in OLT).

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
