### Message from the Guest Editor

Dear Colleagues,

In this issue on the medical management of tuberculosis, we encourage submissions on any of these topics. We are specifically interested in studies that address the optimal use of new drugs and/or treatment regimens, host-directed therapies, and/or the unique treatment needs of the special populations listed above. Studies can include those that report on original unpublished research or systematic reviews. We aim to provide a topical update on recent advances in the medical management of TB and to highlight research that addresses outcomes among populations at especially high risk for poor responses to therapy.
