Message from the Guest Editors

Dear Colleagues,

Metronomic chemotherapy has finally arrived in clinical use. After 20 years of preclinical development and clinical trials, the emerging data will be of paramount importance in allowing us to assess the impact of metronomic chemotherapy on different tumor types. Indeed, it is likely that the next decade will see a major reassessment of the possible applications of metronomic chemotherapy, alone and in combination with new therapeutic approaches such as immunotherapies, for the management of cancer.

This Special Issue is our attempt to cover the past and present clinical results that have brought us to this pivotal moment and build the bases for future clinical developments. The expectation today is that this different approach to clinical research on chemotherapy will translate into genuine progress in routine therapy. With this Special Issue, we hope to encourage submissions that discuss the current state-of-the-art, address ongoing knowledge gaps, and focus on ongoing controversies related to metronomic chemotherapy.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
