Message from the Guest Editor

We are in the modern era of innovations, technological developments and minimisation in the field of urology. While laparoscopy and robotic surgery have revolutionised pelvic and upper tract oncology, there is continuous evolution and increasing use of these in the field of benign conditions and paediatric urology. As lasers have changed endourology, new minimally invasive surgical techniques (MISTs) have given a new meaning to benign prostate hyperplasia (BPH) surgery.

These new technological developments have led to improvements in patients' quality of life (QoL), shorter hospital stays and reductions in complication rates.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
