Prof. Dr. Flavia Franconi

Laboratory of Sex-Gender Medicine, National Institute of Biostructures and Biosystems, Sassari, Italy

Dr. Matteo Monami

Diabetology, Careggi Hospital and University of Florence, Florence, Italy

Deadline for manuscript submissions:

closed (25 January 2024)

Message from the Guest Editors

Dear Colleagues,

Diabetic foot (DF) is a leading cause of disability and early mortality in people with diabetes. It also represents a paradigmatic example of how the collaboration between clinical and basic researchers together with multidisciplinary health professionals can represent an added value for the improvement in all health goals in people with DF, even overcoming the recent storm of the COVID-19 pandemic. Furthermore, this complication appears to affect males far more than females, while little is known about gender differences in the risk of adverse outcomes in people with DF. Consequently, original contributions on this new theme are welcomed, justifying the presence of a Co-Guest Editor with renowned expertise about this aspect (Prof. Franconi).

In conclusion, the purpose of this Special Issue is to provide a comprehensive overview of the up-to-date clinical aspects of DF disease, including the use of innovative techniques and technologies in interventional therapies. For this reason, we encourage multidisciplinary researchers in the field of DF and related diseases to submit their findings as original articles or reviews to this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
