Deadline for manuscript submissions:

**closed (20 September 2021)**

### **Message from the Guest Editors**

Impaired renal function leading to chronic kidney disease is a major clinical problem in children/adolescents and in adults. Screening for early diagnosis of impaired renal function may enable more effective prevention and slow the progression of the disease. While the ultimate goal is to find new therapies needed to minimize the progression of renal injury, the interests of clinicians have focused on the potential role of body fluid markers. That is why there is still ongoing search for new biomarkers that would present with high sensitivity and specificity for early renal damage.

The aim of this Special Issue is to gather original articles and reviews demonstrating advances in the diagnosis and treatment of various kidney disease in children. Original research articles, systematic reviews, and focused review articles are welcome. Articles focused on *novel biomarkers* used in the diagnostic and prognostic evaluation of common *kidney diseases in children* are especially encouraged.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
