Message from the Guest Editor

Minimally invasive surgery for advanced colorectal cancer is a sophisticated procedure that achieves functional preservation and oncologic curability. However, there is insufficient evidence for the effectiveness of laparoscopic and robotic surgery in achieving these goals.

We would like to present the outcomes of laparoscopic, robot-assisted colorectal surgery and taTME from the perspective of both radical cure and functional preservation, as well as discuss emerging challenges and the new techniques and strategies used to overcome them.

In addition, multidisciplinary treatment has improved the outcomes of rectal cancer. Highly invasive lesions (direct invasion of the anterolateral region, lateral lymph node metastasis, major vascular invasion, and local recurrence) can determine the prognosis. This Special Issue aims to report on these surgeries, including the techniques used and results achieved, with the hope of promoting further advances in this field.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
