Deadline for manuscript
submissions:

31 March 2025

Message from the Guest Editors

Dear Colleagues,

The Special Issue seeks to cover a broad spectrum of topics, including, but not limited to, surgical techniques, perioperative care, and multimodality treatment. We will discuss minimally invasive surgery (video-assisted and robotic-assisted thoracic surgery), the role, limitations, and technical advancements of segmental resections, and surgical treatment in advanced lung cancer. Additionally, we will focus on the role of Enhanced Recovery After Surgery (ERAS) protocols in preventing postoperative complications and the integration of immunotherapy with surgery for improvement of lung cancer treatment results. We encourage submissions that provide insights into overcoming core problems, such as the limitations of existing surgical methods and the effective combination of multimodal therapies. By bringing together leading experts and the latest research, this Special Issue aims to advance the standards of surgical care in lung cancer treatment and foster collaborations that lead to transformative clinical practices.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
