Message from the Collection Editor

Dear Colleagues,

Obesity is a chronic disease with a very negative impact on health. According to the World Health Organization, 39% of adults worldwide are overweight and 13% are obese. Obesity is a known risk factor for type 2 diabetes, high blood pressure, metabolic syndrome, sleep apnea, fatty liver disease, and many other comorbid conditions.

Currently, bariatric surgery is the standard treatment for obesity, resulting in significant and lasting weight loss and reducing comorbidities in patients. Some interventions have disappeared, others, even more efficient and secure, have appeared.

This last year, a collective awakening took place due to the COVID-19 pandemic, which highlighted that obesity was an independent factor of mortality causing devastation in the population suffering from obesity. This challenge needs to be faced together through clinical and scientific studies reported by different teams through publications.

We invite you to submit your research in the field of bariatric and metabolic surgery and nutrition, focusing on all aspects (challenge, trends, and prospects) that can improve our daily practices.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
