Message from the Guest Editor

Dear Colleagues,

Osteoporosis is a common and well-known disease, associated with fractures. These fractures lead to pain, disabilities, and incapacitation but are also associated with a higher mortality rate. However, despite this simple and clear assessment, osteoporosis remains an underdiagnosed and, therefore, undertreated disease. Although medical conditions leading to low bone mineral density and fracture risk are widely known to the medical community, screening these patients for osteoporosis is not effective enough. Moreover, even after fragility fracture, therapeutic prescription is often forgotten.

This Special Issue aims to reduce this treatment gap and focuses on recognizing and screening for osteoporosis, especially after fracture and among patients with medical chronic diseases. Articles on osteoporosis screening, secondary osteoporosis, treatment gap or fracture detection are welcomed, as are any articles helping to better recognize osteoporosis or describing new or alternative methods of osteoporosis diagnosis.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
