Message from the Guest Editor

Some of the most important topics in the paediatric intensive care currently are (1) the ventilatory support and (2) the best way to monitor the respiratory status of the patient. Recently new technologies and strategies have expanded around the world and some of them without robust evidence based on randomised control trials. Even more, the economical impact of some of these different technologies involved in the respiratory support is considerable. The aim of this clinical update is to provide a updated overview of the most important topics regarding the respiratory support and monitoring in critically ill paediatric patients.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
