Message from the Guest Editor

Pelvic floor disorders such as pelvic organ prolapse, urinary incontinence or voiding disorders are common and may significantly affect quality of life. Treatment options for POP include bedside observation, pessary use and pelvic floor surgery. The latter currently has a lifetime risk of 11.1% and is equally expected to increase. Furthermore, overactive bladder syndrome as well as stress urinary incontinence are also common diseases. Treatment involves conservative approaches such as weight reduction or improved fluid intake, as well as physical therapy in the form of pelvic floor training or bladder training. Pharmacological medication includes antimuscarinic and beta-adrenergic drugs, as well as estrogen agents. Additionally, incontinence surgery is a further option.

The aim of this Special Issue is to collect and publish original articles as well as reviews demonstrating advances in the diagnostic and therapeutic research field of urogynecology. In summary, better understanding in this field could also help clinicians better guide their patient toward suitable treatment decisions.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
