Message from the Guest Editor

It is always challenging to treat critically injured patients. Decision making, timing and strategical planning are highly individualised and require long years of experience. In this sense, critical injury means a multi-system involvement and not only orthopaedic trauma. To find the best path in the treatment of such patients, a polypragmatic approach is often necessary, with sometimes unsatisfying results. New efforts and approaches have to be found to improve standards and outcomes in the treatment of multiply-injured patients. Besides the conventional scientific efforts, interprofessional projects could lead to new insights, interpretations, and unexpected conclusions in this dramatic field of medicine.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
