closed (20 March 2022)

Message from the Guest Editors

Prenatal diagnosis has developed widely in recent years, especially thanks to advances in fetal imaging and the incorporation of other techniques for fetal evaluation, such as 3D ultrasound or fetal MRI. Prenatal detection of fetal abnormalities enables prenatal multidisciplinary counselling and establishing measures for optimizing fetal surveillance and reducing associated morbidity and mortality.

Today, challenges in prenatal diagnosis concern not only diagnosis but also the identification of maternal, prenatal sonographic or environmental risk factors that correlate with postnatal outcome and prognosis, to better establish treatments and medical interventions and to reduce complications and improve long-term outcome.

This Special Issue aims to select original research papers and review articles that discuss the current state of the art, address existing knowledge gaps, and focus on improving the diagnosis and treatment of fetal malformations, as well as those improving prenatal prediction of postnatal evolution.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
