Deadline for manuscript submissions:

closed (15 November 2023)

Message from the Guest Editor

We invite you to participate in this Special Issue of JCM on “Prevention, Treatment, and Complications of Diabetes Mellitus”. As you well know, diabetes mellitus (DM) is a major health problem and, due to complications, is one of the leading causes of blindness, kidney failure, and lower limb amputation. Furthermore, DM notably increases the risk of developing cardiovascular disease and reduces the quality of life.

Regarding treatment, that for type 1 DM continues to be based on insulin therapy with multiple injections or on the implantation of continuous insulin infusion systems, and for both, the application of sensors that continuously determine glucose levels represents a remarkable advance for metabolic control. On the other hand, the treatment of type 2 DM has become more complex, with multiple proposals oriented toward individualization depending on the characteristics of the patient (age, comorbidities, weight, empowerment, and cost).

We look forward to receiving your submissions to this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
