Message from the Guest Editors

Dear Colleagues,

Psychiatric disorders in children and adolescents are relevant both in terms of their prevalence and their impact on the quality of life of the child/adolescent and their family. Psychiatric disorders include emotional symptoms (i.e., anxiety, emotional dysregulation, peer problems) and/or behavioral symptoms (hyperactivity, oppositional, and conduct problems). An especially relevant topic is represented by neurodevelopmental disorders (ADHD, Autism). Even though their characteristics might change across time, their symptoms and consequences echo for the whole lifespan. Often children and adolescents present co-morbidity of psychiatric disorders; therefore, they require a specific approach integrating contributions from different professionals. Therefore, the current Special Issue aims to gather original and exciting articles presenting the latest news about the treatment of youths' psychiatric disorders. We will also consider articles exploring the protective and risk factors of psychiatric symptoms in children and adolescents.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
