Deadline for manuscript
submissions:

closed (15 July 2021)

Message from the Guest Editors

Patients in most surgical fields are continuously getting older and have multiple comorbidities. Nevertheless, they should recover from the surgical procedure safely, painlessly, quickly, and more and more importantly, cost-effectively. We all can definitely all participate in realizing these goals.

We are now looking forward to your submission of interesting manuscripts regarding the latest innovative therapies, ERAS, monitoring and equipment, acute pain therapy, anesthesia, regional anesthesia, intensive care medicine, pharmacology, and modern organizational concepts. The submitted work may come from any surgical discipline, intensive care medicine, anesthesiology, as well as other topics. The submissions should mainly be original work, but systematic reviews and meta-analyses are being accepted. Please use the chance to intensively discuss your new findings in reflection of the current standard of care and describe how these findings can be used to improve postoperative care of our patients in the future. We gratefully look forward to receiving your submissions.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
