Message from the Guest Editor

Dear Colleagues,

Cardiovascular diseases are among the biggest health burdens on societies worldwide. High mortality and morbidity affect both life expectancy and life quality, simultaneously causing adverse economic effects by increasing healthcare costs and reducing productivity. The spiking prevalence of risk factors is associated with a climbing incidence of diseases. To counteract this ominous trend, it is crucial to discover, understand, and effectively treat risk factors of cardiovascular disease. Research should be conducted on multiple levels—from the molecular bases of how risk factors affect the development and progression of the diseases to public health and economic aspects. The recent COVID-19 outbreak has shown that risk factors of cardiovascular diseases are not only relevant for cardiologists. Comorbidities such as obesity and hypertension belong to the most important factors affecting mortality after SARS-CoV2 infection. By limiting the risk factors and hence prevention of cardiovascular diseases we can increase life expectancy, improve life quality, and limit healthcare costs.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
