Message from the Guest Editors

Minimally invasive and robotic surgery has been adopted in many areas of surgery to reduce patient morbidity during surgical resection. To achieve this, endoscopic and robotic instrumentation coupled with improved imaging tools and localisation techniques have been developed, to enable adequate resection of tumours with minimum damage to surrounding tissues.

In the initial stages of head and neck cancer, minimally invasive surgery—manual and robotic—is today the standard of treatment. The future interests of minimally invasive surgeons in the coming years will be addressed to more complex procedures including the treatment of locally advanced cancers after chemotherapy. In this Special Issue we will review the techniques, indications and results of the application of minimally invasive surgery in the head and neck, focusing not only on the current standard, but also evaluating future applications and new perspectives.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
