Deadline for manuscript
submissions:

20 October 2024

Message from the Guest Editor

Dear Colleagues,

New techniques and devices in the field of spinal surgery are widespread and have improved outcomes, especially in pain relief and quality of life. However, in an aging society, a crucial issue is the validation of the safety of new techniques and devices and the prevention of perioperative complications after spinal surgery. The benefits of these advances in reducing complications such as surgical site infection, postoperative delirium, epidural hematoma, and neurological deficits, as well as future directions in spinal surgery, will be explored in this Special Issue.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
