### Message from the Guest Editor

Dear Colleagues,

The use of saliva in diagnostics is becoming increasingly popular as the composition of saliva usually reflects the composition of blood plasma. Saliva collection is non-invasive, painless, and cheap, while also being very comfortable for both children and the elderly. In addition, saliva can be collected at home, without the involvement of medical staff. Importantly, the use of saliva is not limited to the diagnosis of oral diseases. Saliva is more often used for the early diagnosis of systemic diseases, including metabolic, cardiovascular, neurological, and genetic disorders. Salivaomics is a rapidly expanding field of knowledge, which includes four diagnostic protein alphabets, mRNAs, miRNAs, metabolic compounds, and microbes. The adoption of non-invasive, rapid, outpatient salivary screening tests could greatly facilitate the early diagnosis of many diseases in the future. In this Special Issue, we will focus on recent advances in salivary diagnostics, including both oral and systemic diseases.

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
