submissions:

closed (25 August 2022)

Message from the Guest Editor

Spinal disorders are common, and lead to substantial morbidity and loss of productivity in society. Spinal disorders can be due to congenital, degenerative, traumatic, and oncological causes. As diagnostic advances such as MRI/MRA, CT/CT myelography, EMG, laboratory testing, and health related quality of life outcomes/patient reported outcome measures have become more commonplace, research advances into these techniques have led to improvements in care of spinal disorders. Similarly, surgical technology and procedures have advanced rapidly over the last generation, making spinal surgery safer and more effective. Only with ongoing research will we be able to continue advancing the field of spine care and spinal surgery.

In this Special Issue, we invite submissions that focus on spinal disorders and spinal surgery. Submissions can be in the form of literature reviews providing insight into current knowledge and technical know-how, as well as original research that addresses key questions in spine care. Spinal disorders are diverse in their presentation, treatment, and outcomes, thus any submission relating to spinal disorders will be considered.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
