Message from the Guest Editor

Vitreo-retinal surgery has experienced great advances and innovations in recent years, such as the standardization of small-incision sutureless systems; the expansion of non-contact viewing systems; the development of new surgical tools, lenses, and vitrectomy machines; and more recently, the use of 3D-viewing systems, intraoperative optical coherence tomography (OCT), and surgical robots. As in every fast-evolving surgical field, these advances are often difficult to spread, validate, and benchmark in a clinical research setting.

This Special Issue aims to select original research papers and review articles that discuss the current state-of-the-art, address existing knowledge gaps, and present clinical outcomes of such advances in modern vitreo-retinal surgery, focusing on their clinical impacts on the management of vitreo-retinal diseases.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
